Preferred Medical Plan of South Florida Selects LogistiCare for Transportation Outsourcing Contract

ATLANTA -- LogistiCare Solutions, LLC, the nation's leading provider of specialized transportation network management, announced today that it has signed a contract with Preferred Medical Plan, Inc. (PMP), a health maintenance organization, to arrange non-emergency medical transportation services for PMP Medicaid members residing in Miami-Dade County.

Under the agreement, LogistiCare's contracted services will include securing and coordinating members' transportation service levels that are medically necessary, i.e., ambulatory or wheelchair; billing and claims processing, and in-depth data analysis reporting. With scalable operations, LogistiCare will utilize its existing local transportation provider network in South Florida to meet the transport needs of PMP members.

"LogistiCare has become the nation's leading company in managing Medicaid non-emergency transportation because it delivers to its clients higher-quality services at lower cost," said Steven Russell, chief financial officer of LogistiCare. "We're pleased to partner with PMP to deliver the same results-driven service that we already provide to a variety of nationally prominent health care organizations."

About the Transportation Network Manager Model

LogistiCare pioneered the transportation network management model, which offers a complete, single contract, outsourcing solution that combines centralized management of certain gatekeeping processes through proprietary technology with management oversight of local, commercial, nonprofit, and public transportation companies that deliver the actual trip service. LogistiCare's market approach ensures the appropriate level of service (e.g., ambulatory, stretcher, wheelchair, ambulance) is provided in the most efficient and satisfactory manner. Prior to this approach, a fragmented system of multiple providers offering varying levels of service existed. The company's network operation centers perform eligibility screening, reservations, billing verification, performance reporting, and IT support. Its business offices ensure proper transportation provider relations, facility outreach, quality assurance, and in many instances routing and dispatching. The model has achieved significant cost savings and fraud reduction, while increasing service levels and cultivation of small business ownership. More important, its introduction into the marketplace has significantly increased health care access for millions of society's most medically and physically fragile populations.

About LogistiCare

Headquartered in Atlanta, Ga., LogistiCare, Inc., is the nation's leading provider of specialized transportation network management. Its managed care clients are among the nation's largest health care companies. Government clients include state Medicaid agencies, school boards and transit authorities. With its market innovation, proprietary software, and proven record of creating budget stability and program integrity, LogistiCare is well known as the thought leader in improving

non-emergency transportation programs. On an annual basis, the company manages a national network of more than 700 transportation companies that deliver the actual customer trip service. In 2002, Logisticare was recognized as one of the nation's fastest-growing enterprises. For more information, visit us at www.logisticare.com.

About LogistiCare in Florida

In Florida, LogistiCare currently operates a network operations center (NOC) in Miami, Fla., and technology development centers in Gainesville and Jacksonville, Fla. LogistiCare entered the ambulance management outsourcing business in Florida in 1989. The company currently provides call taking, routing and dispatching services to multiple transportation companies that in turn provide ADA paratransit, Medicaid non-emergency transportation and hospital transportation. The Miami NOC also handles call intake for the company's West Coast operations.
