LogistiCare Donates Computer Equipment to Help Disabled Individuals

ATLANTA -- LogistiCare announced today that it has donated computer equipment to Tech-Able, a Conyers, Ga.-based organization that provides individuals with disabilities, their families and support professionals, information and access to Assistive Technology devices.

"We are very happy to be able to offer this equipment to Tech-Able and all the people it works so hard to serve," said Derek Gilbert, chief information officer of LogistiCare. "A core part of our mission is serving the needs of disadvantaged citizens, so this donation is a logical way for us to further help support the communities in which we live and work."

"Companies like LogistiCare really help us do what we do," said Carolyn McGonagill, executive director of Tech-Able. "Donations are appreciated more than people understand. Without such assistance, meeting our mission becomes much more challenging. We are grateful for their assistance."

The computer equipment included 59 Pentium and Pentium II CPUs, 72 15-inch monitors, keyboards, mice and power cords. A number of the systems will immediately be given to individuals who have been waiting for computers but do not have the financial means to acquire one on their own. Beneficiaries of this donation will include, special education students, special education classrooms/educators and the elderly.

About LogistiCare

Headquartered in Atlanta, LogistiCare is the nation's leading provider of specialized transportation network management. The company's government clients include state Medicaid agencies, school boards, transit and paratransit authorities. Health care sector clients include hospital systems and many of the nation's largest managed care organizations.

With its market innovation, proprietary software, and proven record of creating budget stability and program integrity, LogistiCare is well known as the leader in improving non-emergency transportation programs. On an annual basis, the company manages a national network of more than 1,750 transportation companies that deliver more than 13 million trips to customers annually.
