

LogistiCare's transportation management system delivers a superior solution for managing special needs student mobility.

Getting there the right way can make all the difference. LogistiCare offers a superior outsourcing solution for school boards and other entities needing to offer secure, safe and effective transportation for medically fragile students with special needs, including those with mobility, visual and hearing impairments. Our superior front-end gatekeeping and management oversight means our clients can devote more time and energy to the core education mission.

Our proven system of operational excellence and customized technology (including telephone, internet, wireless mobile data, and global positioning systems) efficiently routes, schedules and matches individual customer needs with the most appropriate level of service. Furthermore, our onboard tracking technology provides reassurance and extra safeguarding during service delivery.

Following is an overview of our specialized offerings.

Multi-modal, ADA-Compliant Vehicles

- Lift-equipped vans
- Minibuses
- Sedans

Comprehensive Transportation Management

- Onboard vehicle tracking via global positioning systems
- Two-way pager for onboard messaging
- EDI routing direct to vehicles
- Staff background checks, drug testing and training (CPR, OSHA, blood-borne pathogen, Passenger Assistance Training, defensive driving)

Service Coordination

- Coordination with other social service programs
- Customer access assurance

Key client benefits include:

- Service provided across a wide geographic area
- Individual customer tracking (magnetic swipe cards capture customer ID number with time and location stamp)
- Cost-effective, reliable outsourcing

Key rider benefits include:

- Enhanced safety and security
- Enhanced service levels

We understand that problem-free mobility isn't just about getting from point A to point B. In fact, specialized transportation demands special levels of care.
